INTERNSHIP PRESENTATION

Web Development Internship

at Sieve Capital

ANIKET YADAV

25SCS1003000981

B.Tech CSE • Batch 2026–27

15 MAY 2026 — 15 AUG 2026

Internship Snapshot

A concise overview of the three-month Web Development internship.

03

MONTHS

Web Development Internship

Sieve Capital

15 MAY → 15 AUG

DOMAIN

Web Development

ORGANIZATION

Sieve Capital

DURATION

3 Months

RECOGNITION

Completion Certificate

INTERNSHIP FOCUS

UI / UX

FRONTEND

API INTEGRATION

TESTING

DEPLOYMENT

02 About Sieve Capital

The professional environment behind my internship.

SIEVE CAPITAL

VENTURE CAPITAL + TECHNOLOGY

Sieve Capital leverages modern software engineering and automation to optimize financial and operational workflows, building high-performance digital platforms, proprietary tools, and data-driven systems.

SERVICES

01

Hands-on technical internships with direct exposure to production-grade software development.

VISION

02

Equip engineering students and early-career developers with industry-ready skill sets.

DELIVERY

03

Work alongside experienced teams on full-stack development, APIs, databases and cloud infrastructure.

THE TAKEAWAY

A technology-driven setting where classroom concepts could be applied to practical development work.

03 Problem → Objectives

Turning academic knowledge into practical web-development capability.

THE PROBLEM

**Code is only
part of the job.**

Production-ready web development also demands responsive design, scalability, maintainability, performance and security.

RESPONSIVE

SCALABLE

SECURE

MAINTAINABLE

OBJECTIVES

1

Understand the end-to-end web development lifecycle and industry-standard workflows

2

Build modern responsive UIs using HTML5, CSS3/Tailwind CSS and JavaScript

3

Improve navigation, mobile responsiveness and cross-browser compatibility

4

Apply state management for seamless data flow across user-facing pages

5

Use cloud hosting and Git/GitHub for deployment and version control

6

Optimize performance, SEO and security practices

04 Technology Stack

Tools and technologies used during the internship.

A complete loop: build → collaborate → debug → deploy → accelerate.

System Architecture

A layered architecture connecting frontend, APIs, business logic and data.

Internship Journey

The internship progressed through five practical development phases.

Key outcomes from my internship experience.

FROM LEARNING TO DELIVERY

The strongest takeaways were the practical skills, workflows and development practices gained during the internship.

01

PRACTICAL DEVELOPMENT

Hands-on experience in building, structuring and maintaining web applications.

02

FRONTEND PROFICIENCY

Responsive web design and modern component-based UI development.

03

COLLABORATION

Git workflows, branch management and collaborative development.

04

DELIVERY MINDSET

Deployment procedures, performance optimization and essential security practices.

Challenges → Solutions

Key development challenges and the practical approach followed during the internship.

CHALLENGE 01

Production-ready responsiveness

Ensuring responsive layouts, mobile compatibility and cross-browser behaviour across standard breakpoints.

SOLUTION

Responsive components + cross-device usability testing + systematic breakpoint checks.

CHALLENGE 02

Backend & data integration

Integrating RESTful APIs and database connectivity with dynamic frontend content.

SOLUTION

API validation + database connectivity + efficient asset loading.

Conclusion & Key Takeaways

What the internship established through practical web-development work.

CONCLUSION

A practical web-development industry experience.

The internship provided hands-on exposure across UI/UX, frontend development, backend API integration, database connectivity, testing and deployment, strengthening practical web-development skills.

BUILD

INTEGRATE

OPTIMIZE

DELIVER

KEY TAKEAWAYS

01

Practical development

Hands-on experience with production-oriented web development.

02

Frontend proficiency

Responsive UI and component-based frontend development.

03

Deployment & best practices

Deployment procedures, performance optimization and security practices.

INTERNSHIP CERTIFICATE & OFFICIAL VERIFICATION

CAPITAL

INTERNSHIP CERTIFICATE

AUG 17, 2026

TO WHOM IT MAY CONCERN

This is to certify that Aniket Yadav has successfully completed a three-month internship as a Web-Developer Intern at Sieve Capital. The internship commenced on 15-May-2026 and concluded on 15-Aug-2026.

Throughout the internship, Aniket displayed strong technical ability, a willingness to learn, and a cooperative attitude that contributed positively to our projects. We acknowledge their efforts and wish them success in their future endeavors.

Sincerely,

Founder
Sieve Capital
